

- If you prefer, you can tell the browser which colour to display by using a hexadecimal code (or hex code). This works in a similar way to the `rgb()` code above, except that hex codes always start with a `#`, and use hexadecimal 'numbers' between `00` and `ff` for the amount of red, green and blue.

Red Green Blue

background: #f a f a d 2;

- Replace the rgb() code in your CSS with the hex code

```
body {  
  color: tomato;  
  background: #fafad2;  
}
```

Banana Milkshake

Ingredients:

Ingredients:

Ingredient	Amount
Banana	1
Milk	250ml
Ice cubes	3

Method:

1. Peel the banana and add to the blender
2. Add the milk and ice cubes to the blender
3. Turn on the blender for 30 seconds
4. Drink!
