

Task 2

Task

1. Add the following line to the <head> of one of your pages

```
<head>  
<link rel="stylesheet" href="stylesheet.css">  
</head>;
```

2. Create a new file called **stylesheet.css**
3. Add the following CSS to the stylesheet.css:

```
.highlight {  
    color: orange;  
    Background: yellow;  
}
```

4. Add a orange link to one of your pages, using the css class *highlight*

Inline style

- Finally there you will also see the “Inline style”

```
<h1 style="color:blue;margin-left:30px;">This is a heading</h1>
```

- But in general this is a BAD BAD BAD idea. Can you guess why?
