

CSS comments

- Comments are used to explain the code. They will help you later when you have to edit the code later.
- Ignored by browsers
- A CSS comment starts with `/*` and ends with `*/`.
Comments can also span multiple lines:

Comments example

```
/* This is a single line comment outside*/  
h2 {  
    /*This is inside, no problem*/  
    text-align: center;  
    color: red;  
    /*Multiline comments  
    are  
    ok too!*/  
}
```
