

Grouping selectors

- If you have elements with the same definitions, like this:

```
h1 {  
    text-align: center;  
    color: red;  
}
```

```
h2 {  
    text-align: center;  
    color: red;  
}
```

```
p {  
    text-align: center;  
    color: red;  
}
```

- It is better to group them like this:

```
h1, h2, p {  
    text-align: center;  
    color: red;  
}
```
