

1. Create a folder on your laptop. Call it **recipe**
2. Create 2 new files recipe.html and recipe.css

A screenshot of a code editor with a dark theme. The editor shows the HTML structure for a file named 'recipe.html'. The code is as follows:

```
1 <html>
2
3   <head>
4     <link rel="stylesheet" href="recipe.css">
5   </head>
6
7   <body>
8
9   </body>
10
11 </html>
```

The code is color-coded: opening and closing tags are red, attributes are orange, and values are green. The file name 'recipe.html' is visible in the tab at the top right.

- For you list of ingredients we are going to build a table
- First add the title

```
<body>  
  <h1>Banana Milkshake</h1>  
  <h3>Ingredients:</h3>
```

# Banana Milkshake

**Ingredients:**
