

- Generally speaking we can say that all the styles will "cascade" into a new "virtual" style sheet by the following rules, where number one has the highest priority:
 1. Inline style (inside an HTML element)
 2. External and internal style sheets (in the head section)
 3. Browser default

More than 1 classes?

- See example 4

```
<head>
  <style>
    .highlight {
      color:orange;
      background: yellow;
    }
    /*try to add underline or more_highlight*/
    .underline {
      text-decoration: underline;
    }
    .more_highlight {
      background: blue
    }
  </style>
</head>
<body>
  highlight
```
