

**cssolves.**

- The need to mash styling rules in the HTML like this:

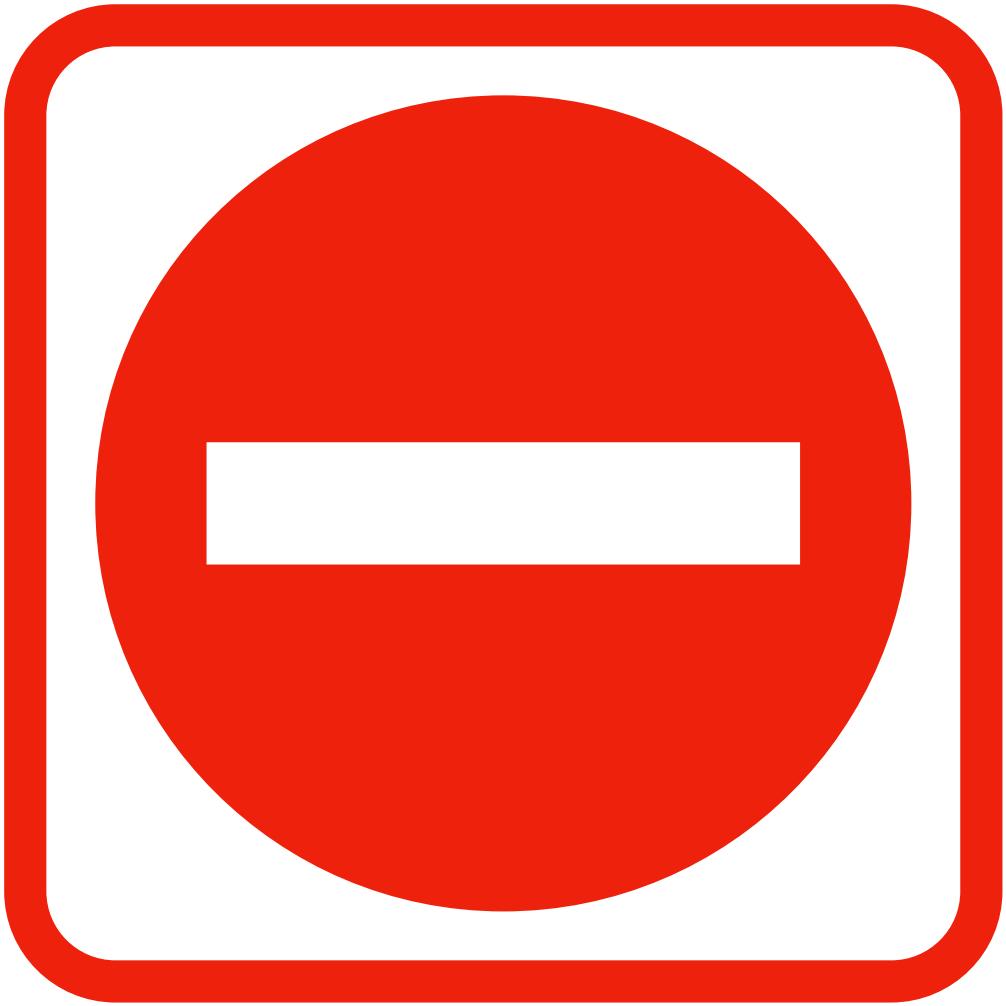

4

5 <font size="12" color="red">

6     yuck

7 </font>

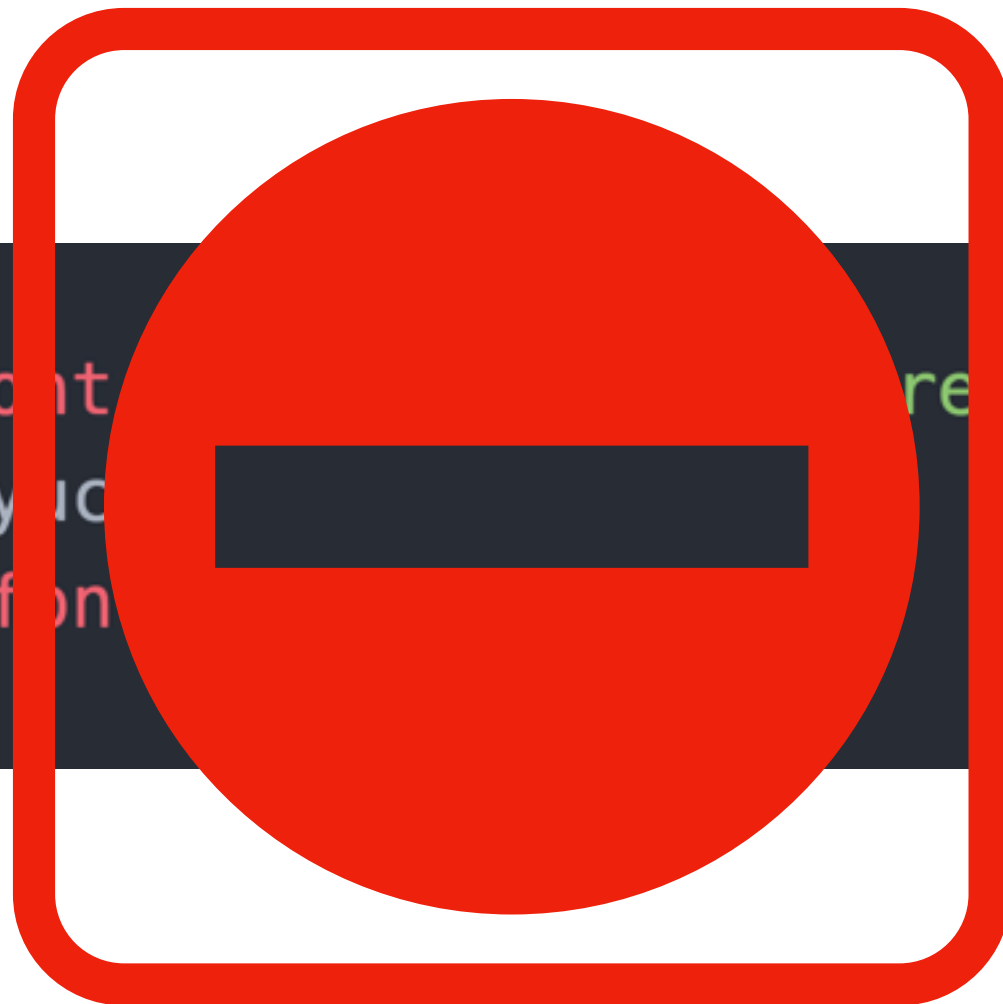

8

# CSS solves ...

- The need to mash styling rules in the HTML like this:

```
4  
5 <font color="red">  
6   you  
7 </font>  
8
```

# Web Browser

- How does a web browser show you a web page?
- It takes HTML markup document then it apply CSS styling rules to the elements in the HTML document.
