

ID Selector

- ID selector uses the 'id' attribute of an HTML element to select
- ID should be unique in a page
- Use # followed by the id of the element

ID Selector examples

```
#apple {  
  color: red  
}
```

```
<h2 class="highlight"> Pancake flavors</h2>  
  <ul>  
    <li id="apple">Apple  
    <li>Blueberry  
    <li>Rasberries
```

- Note: Id cannot start with a number
