

- Let's add some colors!
- You've already learnt how to add coloured text to a webpage. Add this code inside your style.css file, to make all of the text in the website body blue:

```
body {  
    color: blue  
}
```

Banana Milkshake

Ingredients:

Ingredients:

Ingredient	Amount
Banana	1
Milk	250ml
Ice cubes	3

Method:

1. Peel the banana and add to the blender
2. Add the milk and ice cubes to the blender
3. Turn on the blender for 30 seconds
4. Drink!

- Our browser knows colours like blue, yellow and even lightgreen, but did you know that your browser actually knows the names of over 140 different colours?
- Look up some colour names in w3school
- Change the colour from blue to tomato!

```
body {  
  color: tomato  
}
```

Banana Milkshake

Ingredients:

Ingredients:

Ingredient	Amount
Banana	1
Milk	250ml
Ice cubes	3

Method:

1. Peel the banana and add to the blender
2. Add the milk and ice cubes to the blender
3. Turn on the blender for 30 seconds
4. Drink!
