

- Let's improve the style of the `<h1>` heading.
- Add the following code underneath your image's CSS:
`h1 {}`
- This is where you'll add CSS properties for your main `<h1>` heading.

```
h1 {  
  
}
```

- To change the font of your <h1> headings, add the following code between the curly brackets: **font-family: Impact;**
- You can also change the size of the heading: **font-size: 50pt;**

```
h1 {  
    font-family: Impact;  
    font-size: 50pt;  
}
```
