

Element Selector

- Instead of classes, you can also use element's name as selector

```
h1 {  
  color: red;  
}  
  
p {  
  line-height: 1.5;  
}  
  
header {  
  font-size: 1.5em;  
}
```

**ONLY use it for certain
cases!!!!**
