

- How about the border property?
- ‘**2px**’ in the code above means 2 pixels. What happens when you change **2px solid black** to **4px dotted red**?

```
border: 2px solid black;
```

```
border: 4px dotted red;
```

- Change the width of the poster to 400px. What happens to the poster?#
- Let's add some CSS to set the background colour of the poster. Go to the end of line 5 of your code and press return, so that you have a new blank line.
- Type the following code on your new blank line:
- background: yellow;

```
div {  
    text-align: center;  
    overflow: hidden;  
    border: 2px solid black;  
    width: 300px;  
  
}
```
