CSS is ...

- Documents that contains styling rules that describe how HTML elements are displayed.

- CSS allows you to control the layout of multiple web pages at all once. **Save you work!**

- **Change the look of entire web site with 1 file!**

CSS is …

- Documents that contains styling rules that describe how HTML elements are displayed.

- CSS allows you to control the layout of multiple web pages at all once. **Save you work!**

- **Change the look of entire web site with 1 file!**

But… how?!!?

- CSS works hand in hand with HTML

- Remember what a HTML document tells us?

  - HTML define the page structure. Examples?
