- **<u>Task 1</u>**

- Add the following to an HTML file you had from your last lesson. Can you figure out where to put the the highlight

```
<html>
<head>
  <style>
    .highlight {
        color:orange;
        background: yellow;
    }
  </style>
</head>
```

How to link your HTML and CSS ?

- What you just did with your CSS file with the <style> tag in the html file is called **Internal Style Sheet**

- You can also use an **External Style Sheet.** Try this out:
