How to link your HTML and CSS ?

- What you just did with your CSS file with the <style> tag in the html file is called **Internal Style Sheet**

- You can also use an **External Style Sheet.** Try this out:

Task 2

Task

1. Add the following line to the <head> of one of your pages

```
<head>
<link rel="stylesheet" href="stylesheet.css">;
</head>;
```

2. Create a new file called **stylesheet.css**

3. Add the following CSS to the stylesheet.css:

```
.highlight {
  color: orange;
  Background: yellow;
}
```

4. Add a orange link to one of your pages, using the css class *highlight*
