- Add this code to the CSS for the body of the webpage, to display a light yellow background:
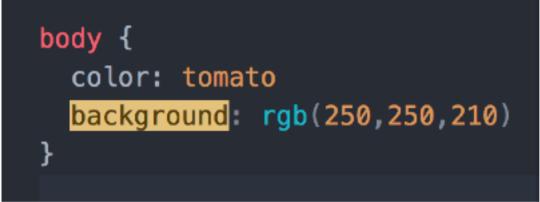

```
background: rgb(250,250,210);
```

```
body {
    color: tomato
    background: rgb(250,250,210)
}
```

Banana Milkshake

Ingredients:

Ingredients:

Ingredient	Amount
Banana	1
Milk	250ml
Ice cubes	3

Method:

1. Peel the banana and add to the blender
2. Add the milk and ice cubes to the blender
3. Turn on the blender for 30 seconds
4. Drink!

- If you prefer, you can tell the browser which colour to display by using a hexadecimal code (or hex code). This works in a similar way to the rgb() code above, except that hex codes always start with a #, and use hexadecimal 'numbers' between 00 and ff for the amount of red, green and blue.

Red Green Blue
